

Name: _____

SPH3U Unit 2: Forces**Unit Goal:** Sled problems

What it is:	an object is pulled forward by a rope or other connection. There will be friction, tension, acceleration...
What we want to do:	<ul style="list-style-type: none"> - friction - tension → to avoid the ropes breaking - acceleration - how hard to pull (force)
What we already know:	<ul style="list-style-type: none"> - acceleration - gravity
What we need to learn:	<ul style="list-style-type: none"> - friction - tension - forces - Newton's 3 Laws of Motion.
